

Heritage Stone Repair Mortar™

Our proprietary line of Heritage Stone Repair Mortar™ is designed specifically for historic brick, stone, and terra cotta. Formulated using only natural ingredients, it contains no portland cement or harmful additives, so it is entirely breathable and will not cause cracking or spalling in historic masonry. It is fast curing and has no minimum application depth, which makes it the most convenient specialty stone repair product on the market. Available in custom colors or it can be colored onsite using our Self Color Kits.
